Experience

Web Design 8, LLC
Full Stack Web Developer
November 2015 - Present (4 years 7 months)
South Texas Area

Build and maintain Drupal and Wordpress websites - backend and frontend.
Update, maintain, add features and troubleshoot existing Drupal and
Wordpress websites. Use React.js and Node.js for web applications. Design
websites using Photoshop and Adobe Illustrator. Configure and maintain
Google Cloud Platform - Linux virtual machines. Manage cloud based
databases.

Accomplishments:

Built an open source Python command line web crawler for taking automated
screenshots of all pages of a website. All screenshots are saved as PNG files.
Purpose of this project was to create visual documentation on how a website

looked prior to turning-over to client or prior to working on it. Github repo: https://github.com/jbernadas/screenshot_py3

Designed, built and maintain a Drupal 8 local government multi-departmental website servicing 11 counties. Website: https://coastalbendcog.org

Designed and built a Wordpress WooCommerce website for a gun grip company. Website: https://texasgrips.com

Education Service Center, Region 2
Web Designer
February 2016 - June 2019 (3 years 5 months)
Corpus Christi, Texas Area

Manage in-house static and Content Management System (CMS) websites. Provide training to staff on how to use CMS websites. Maintain Drupal and Wordpress websites, create custom modules/plugins and create new themes/templates. Create interactive forms using ReactJS. Maintain MySQL databases for all websites. Configure, maintain and update Linux server and databases.

Accomplishments:

Built a Drupal 7 multisite system consisting of 38 independent websites using one source code connected to different databases.

Built Wordpress websites for departmental programs funded by federal and state government agencies.

Built a React.js app that calculates payments for different programs and services offered by Education Service Center, Region 2.

Freelance Web Designer (Self-employed)
Freelance Web Designer
January 2013 - November 2015 (2 years 11 months)

Create websites for small companies and individuals. Use Bootstrap, Wordpress and Drupal to build websites. Use HTML5, CSS3/Sass, PHP, Javascript, MySQL and Git to build websites. Set up and deploy websites to web hosting providers.
